TimeWorksPlus®

TimeWorksPlus delivers the latest in cloud-based punch and time card services supporting intelligent clock features and a wide range of clocks. Track and manage punches, time cards, time-off requests and accruals. Seamlessly integrates with payroll services.
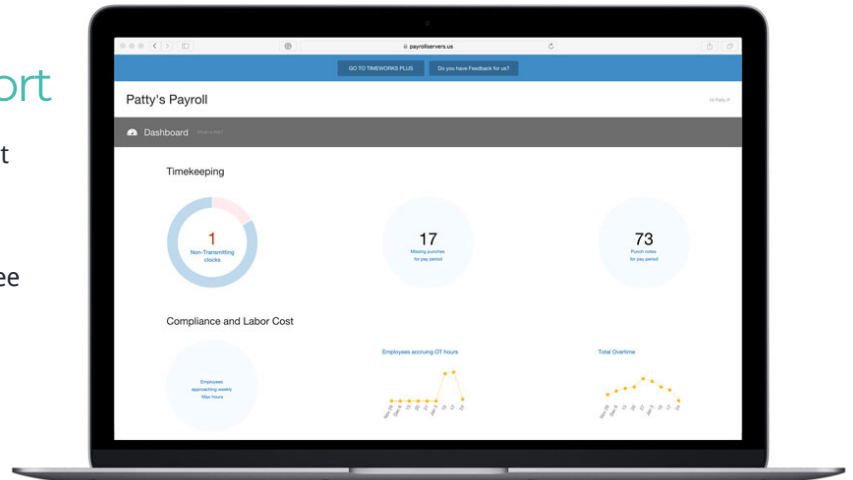

TimeWorksPlus Clock Support

TimeWorksTouch - Touch-screen clock with fingerprint reader and interactive employee prompts

Web-based Clocks - Embedded time clocks in employee portals, web pages and HCM applications

Mobile - Mobile apps for iOS and Android

Hardware Clocks - Multiple other clocks with authentication via PIN, proximity, magnetic or hand readers.

Cloud-based Timekeeping Service

Intelligent Clock Features
Employee state awareness eliminates duplicate and missed punches, while tracking meals and breaks

Clock Lock-out
Prevent early punches with schedule enforcement

Flexible Configuration
Customized pay rules, overtime calculations, compliance requirements and accrual application

Employee Self-service
Employee portal for time-off requests, time card approvals and review of schedules and PTO balances

Payroll Integration
Auto-sync timekeeping and payroll systems and significantly reduce processing time.

Reports and Audit Data
Insight and tools for absence and overtime management, leave planning, and compliance.

Subscription Service
One service provides you with everything needed for interactive and automated workforce management.
